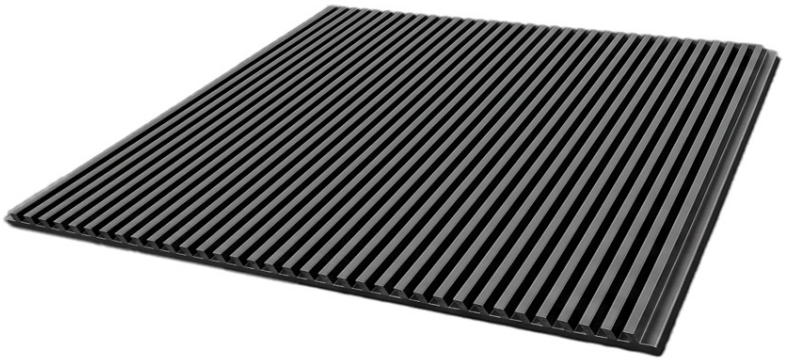
HVAC Pads

Cut-to-size anti-vibration pads for supporting HVAC equipment.



AMC Mecanocaucho **HVAC pads** are a simple, cost-effective way to support **air-conditioning units, ventilation equipment and light machinery** that do not require a high level of noise and vibration isolation. They come in two sizes, **280 x 280 x 10 mm** and **380 x 380 x 12 mm**. They are made from 55 Shore elastomer and rated for a maximum load of 4 kg/cm².

Their main advantage is versatility: installers **cut them to size** on site and either place them directly under the equipment base or feet or bond them in place with adhesive. This reduces vibration transmitted to the structure, protects the supporting surface and keeps the machine stable.

Technical characteristics

- **Sizes:** 280 x 280 x 10 mm and 380 x 380 x 12 mm
- **Hardness:** 55 Shore
- **Maximum load:** 4 kg/cm²
- **Weight:** 0.64 kg (280 mm) / 1.58 kg (380 mm)
- **Cut to size** for each support point
- **Installation:** loose-laid or bonded with adhesive

Formats

- 280 x 280 x 10 mm
- 380 x 380 x 12 mm
