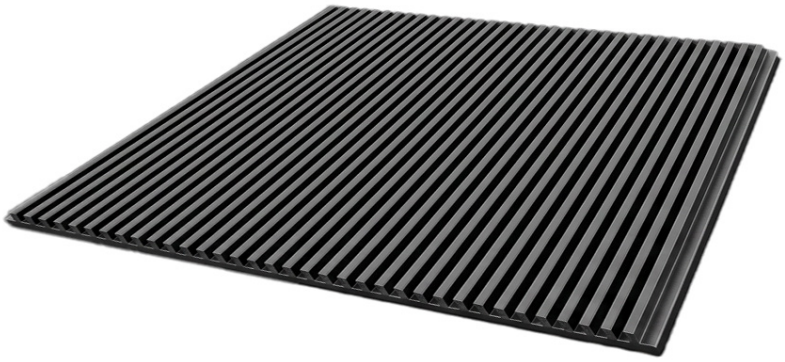
HVAC Pads

Cut-to-size vibration isolation pads for HVAC equipment.



AMC Mecanocaucho **HVAC pads** are a simple, cost-effective way to support **rooftop units, condensers, air handlers and light mechanical equipment** where high-performance noise and vibration isolation isn't required. They're available in two sizes, **11.02" x 11.02" x 0.39"** (280 x 280 x 10 mm) and **14.96" x 14.96" x 0.47"** (380 x 380 x 12 mm). They're made from 55 Shore elastomer and rated for loads up to 57 psi (4 kg/cm^2).

Contractors can **cut them to size** on the job site and either set them directly under the equipment base or feet or bond them in place with adhesive. The pads reduce vibration transmitted to the building structure, protect the mounting surface and keep the unit stable.

Technical characteristics

- **Sizes:** 11.02" x 11.02" x 0.39" and 14.96" x 14.96" x 0.47"
- **Hardness:** 55 Shore
- **Max. load:** 57 psi (4 kg/cm^2)
- **Weight:** 1.4 lb (11" pad) / 3.5 lb (15" pad)
- **Cut to size** for each support point
- **Installation:** loose-laid or adhesive-bonded

Formats

- HVAC Pad 11.02" x 11.02" x 0.39"
- HVAC Pad 14.96" x 14.96" x 0.47"
