

Suspente antivibratile Akustik 3 High + Sylomer®

Suspente antivibratile avec Sylomer® et fenêtre haute facilitant le montage. Fixation directe et isolation performante des plafonds suspendus.

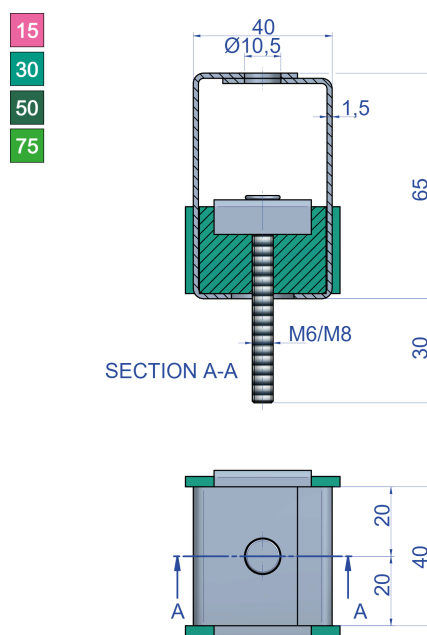

La **suspente antivibratile Akustik 3 High + Sylomer®** est conçue pour la désolidarisation acoustique des plafonds suspendus, des tuyauteries et des équipements suspendus.

Sa **fenêtre haute** offre davantage d'espace pour le montage et facilite l'installation et le réglage de la suspension. L'élément élastique en **Sylomer®** réduit efficacement la transmission des vibrations et du bruit solidien vers la structure porteuse.

Sa conception associe ainsi **facilité de montage, fixation robuste et isolation vibratoire performante**.
