

Suspentes antivibratiles Akustik Saw + Sylomer®

Suspentes antivibratiles avec fixation directe sur profilé et élément élastique en Sylomer®. Montage rapide pour plafonds suspendus et équipements techniques.

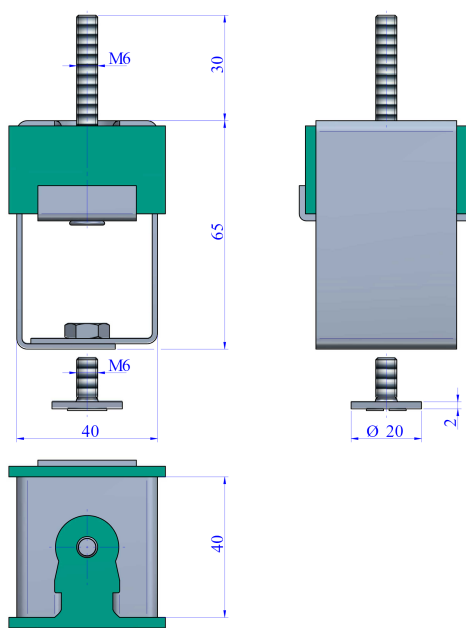

Les **suspentes antivibratiles Akustik Saw + Sylomer®** sont conçues pour la suspension de **plafonds suspendus, tuyauteries et équipements techniques**, en réduisant la transmission des vibrations et du bruit solide à la structure porteuse.

L'élément élastique en **Sylomer®**, en polyuréthane microcellulaire, assure une désolidarisation efficace et permet d'adapter les performances de la suspente aux différentes charges de l'installation.

La configuration **Akustik Saw** permet une **fixation directe et rapide sur le profilé**, facilitant la mise en œuvre sur chantier tout en assurant une liaison mécanique fiable.

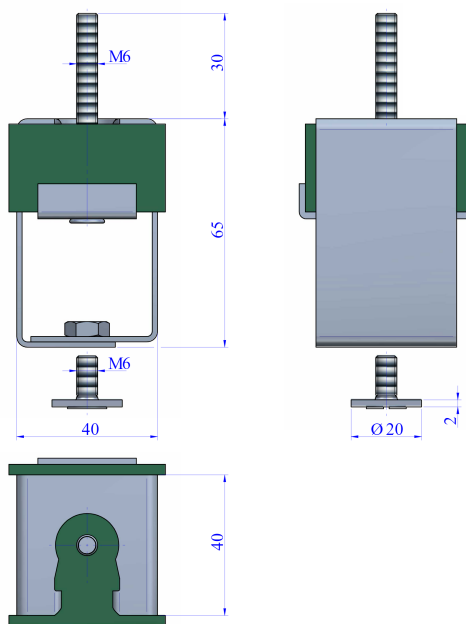

Plans

Akustik Sierra + Sylomer®15 Type A / Akustik Saw + Sylomer®30 Type A

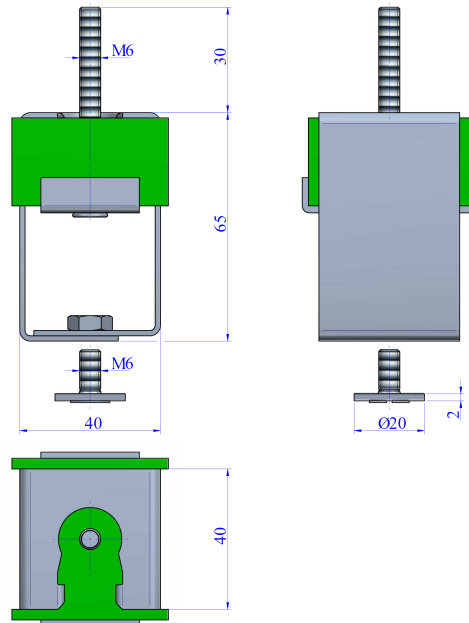

Type	SOMMAIRE	Charge Max.(kg)	Code	Poids(kg)
Akustik Sierra + Sylomer®15 Type A	-	15	23197	0.133
	Akustik Saw + Sylomer®30 Type A	-	30	23863

Akustik Saw + Sylomer®50 Type A

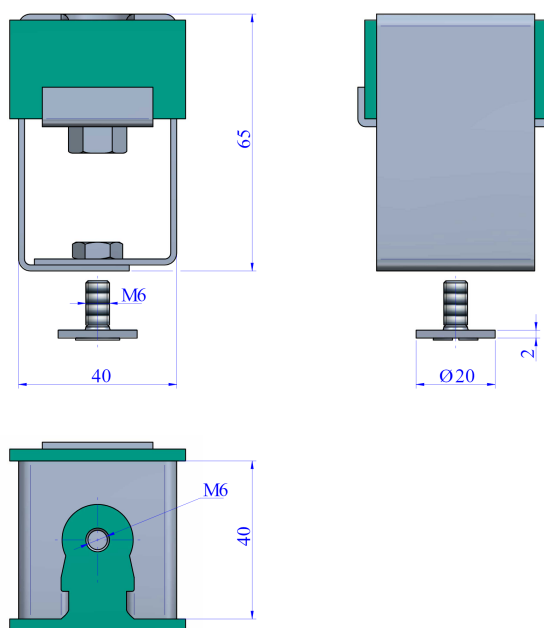

Type	SOMMAIRE	Charge Max.(kg)	Code	Poids(kg)
