Akustik Tiltfix Super T-47

T-47 support with 90° rotation, screw fixation and height adjustment via threaded rod. Mechanical precision without elastic element.

The **TILTFIX SUPER T-47 FIXATION** accessory allows a simple and secure fixation thanks to the metallic edges that allow a double point fixation to the fixing surface. This allows a high tensile resistance, allowing the accessory to adapt to a wide variety of applications with different load requirements.

It is used to hang sloped suspended ceilings. When it is used in combination with the Akustik Tiltfix Fixation, it allows the elastic suspension of sloped ceilings even when the structural ceiling is not horizontal. It is conceived to be used with T-47 profiles.

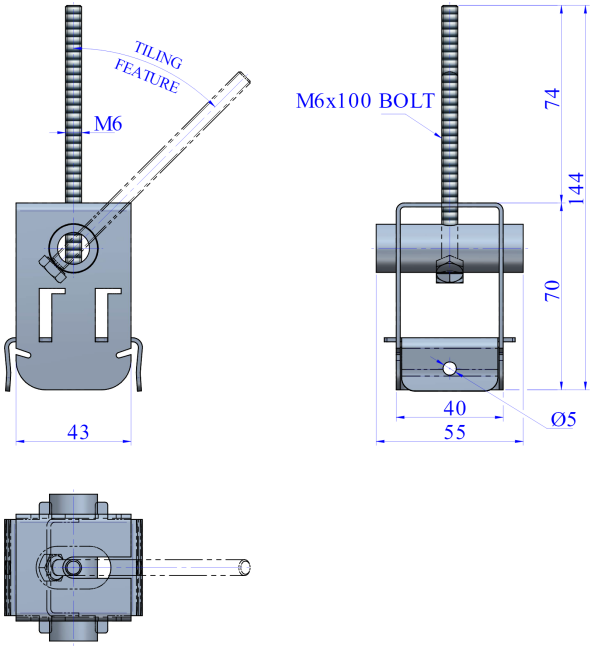

The chrome anticorrosive treatment increases resistance of the plate to arduous corrosive environments, so this accessory can be used in both indoor and outdoor applications.

Akustik Tiltfix Super T-47	23775

Advantages

Easy Installation

This mount requires minimal structural modifications, making installation quick and straightforward.

Secure ceiling anchorage

With more than one fixing point to the overhead slab, it is particularly reliable for anchorages with low load-bearing capacity.
