AKUSTIK LATERAL + SYLOMER®

These acoustic hangers have been conceived for lateral fixing to wall or beam of false ceilings with 11/2 x 1/2 channels or 12 gauge wires.

These **acoustic hangers** have been conceived for the suspension of false ceilings with 11/2 x 1/2 channels or 12 gauge wires.

The excellent properties of the Sylomer® microcellular polyurethane material achieve elevated isolation values as opposed to other mounts that use rubber or cork, or a combination of both. These antivibration mounts are manufactured in two special mixes of Sylomer® to adapt better to the load of each application.

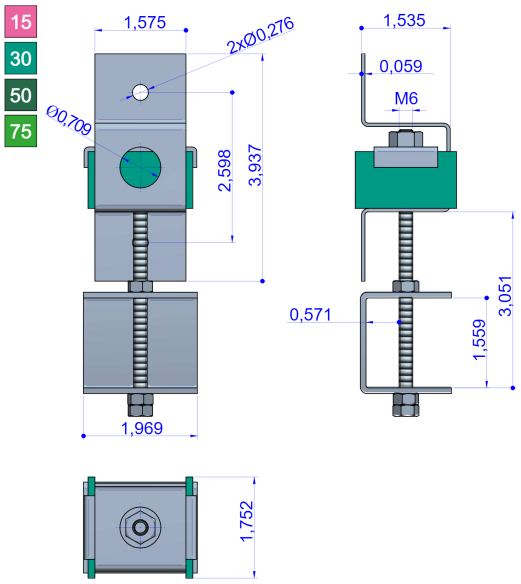

A great variety of fixing metal armors and elements facilitate the installation and to adapt better to each type of job. Their rugged metal parts can withstand tensile stresses from 650Kg to 1000Kg. They are supplied with an anticorrosive treatment that can withstand the toughest environments.
