

Akustik Saw +Sylomer®

Acoustic hanger with integrated threaded connection for sawtooth profiles. High-performance Sylomer® vibration isolation for suspended building services.

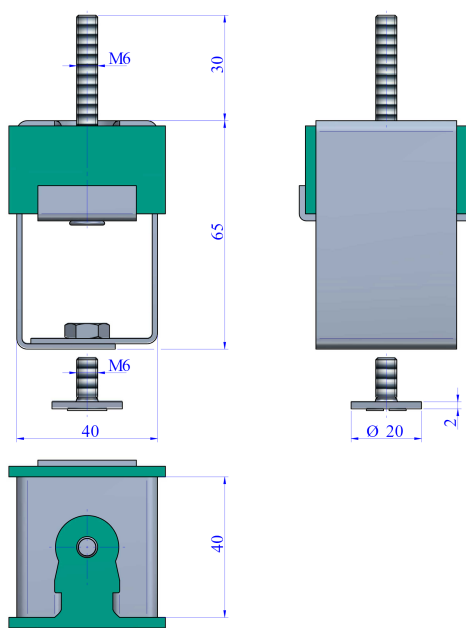

The AMC-MECANOCAUCHO® Akustik Saw + Sylomer® range has been developed for the vibration isolation of suspended ceilings, HVAC services, pipework and suspended mechanical equipment using sawtooth ceiling profiles.

Its integrated threaded connection provides a compact and secure fixing solution while the Sylomer® microcellular polyurethane element effectively reduces the transmission of structure-borne vibration and noise. The range is available in two Sylomer® grades, allowing the isolator stiffness to be matched to the supported load for optimum acoustic performance.

A wide range of fixing accessories ensures fast installation and compatibility with different ceiling systems. Heavy-duty steel components withstand tensile loads from 650 kg to 1,000 kg and feature a corrosion-resistant finish for reliable long-term performance.
