Sound Clip Akustik + Sylomer® Acoustic Clip

Low-profile acoustic clip with Sylomer® for isolating wall linings and ceilings using Omega channels. Fast installation with minimal loss of space.

The Sound Clip Akustik + Sylomer® acoustic clip is designed for the acoustic isolation of wall linings and ceilings constructed with Omega channels.

The Sylomer® elastic element effectively reduces the transmission of vibration and structure-borne noise between the lining system and the supporting structure. Its low-profile design improves acoustic performance while minimizing the loss of usable space.

The Sound Clip system provides fast and secure attachment of the channels, ensuring effective acoustic decoupling of walls and ceilings.
