

HVAC Pads

Cut-to-size vibration isolation pads for HVAC equipment.

AMC Mecanocaucho **HVAC pads** are a simple, cost-effective way to support **rooftop units, condensers, air handlers and light mechanical equipment** where high-performance noise and vibration isolation isn't required. They're available in two sizes, **11.02" x 11.02" x 0.39"** (280 x 280 x 10 mm) and **14.96" x 14.96" x 0.47"** (380 x 380 x 12 mm). They're made from 55 Shore elastomer and rated for loads up to 57 psi (4 kg/cm²).

Contractors can **cut them to size** on the job site and either set them directly under the equipment base or feet or bond them in place with adhesive. The pads reduce vibration transmitted to the building structure, protect the mounting surface and keep the unit stable.

Drawings

HVAC Pads 280x280x10mm

Type	A(in)	B(in)	C(in)	Weight(lbs)	Max. Load (kg/cm2)	Code	Shore
HVAC Pads 280x280x10mm	11.02	11.02	0.39	1	4	152027	55Sh

HVAC Pads 380x380x12mm

Type	A(in)	B(in)	C(in)	Weight(lbs)	Max. Load (kg/cm2)	Code	Shore
HVAC Pads 380x380x12mm	14.96	14.96	0.47	3	4	152028	55Sh

Technical characteristics

- **Sizes:** 11.02" x 11.02" x 0.39" and 14.96" x 14.96" x 0.47"
- **Hardness:** 55 Shore
- **Max. load:** 57 psi (4 kg/cm²)
- **Weight:** 1.4 lb (11" pad) / 3.5 lb (15" pad)
- **Cut to size** for each support point
- **Installation:** loose-laid or adhesive-bonded

Formats

- HVAC Pad 11.02" x 11.02" x 0.39"
- HVAC Pad 14.96" x 14.96" x 0.47"
