JT Machine Vibration Isolators

Compact and cost-effective machine vibration isolator designed for simple installation without floor anchoring, ideal for light machinery and equipment.

The **AMC-MECANOCAUCHO® JT Machine Vibration Isolators** are designed for the installation of **light machinery and equipment where floor anchoring is not required**.

Their compact design allows **quick and simple installation** while providing stable support for the machine. The **height-adjustment system** facilitates accurate leveling of the equipment.

The isolator design also accommodates **minor floor irregularities or variations in slope**, helping ensure correct load distribution between the different support points.

Thanks to their **simplicity, compact dimensions, and cost-effective design**, JT vibration isolators are particularly suitable for **small machines, auxiliary equipment, and light industrial applications**.

Technical characteristics

The elastomer used is a mixture of oil-resistant synthetic Nitrile Butadyene Rubber (NBR).

Advantages

Easy installation

This mount requires no major modifications to the structure for installation.
