A-35 Trapezoidal Vibration Isolator Kit

Kit of 4 trapezoidal vibration isolators with mounting accessories, designed for vibration isolation of HVAC equipment.

The **AMC-MECANOCAUCHO® A-35 Trapezoidal Vibration Isolator Kit** is a complete set designed to simplify the installation and **vibration isolation of HVAC equipment**.

The kit includes **4 trapezoidal vibration isolators together with their mounting accessories**, providing a simple and quick method for installing the equipment on its supporting structure.

The elastomer elements provide an **elastic connection between the equipment and the structure**, helping to reduce the transmission of vibration and **structure-borne noise** generated during operation.

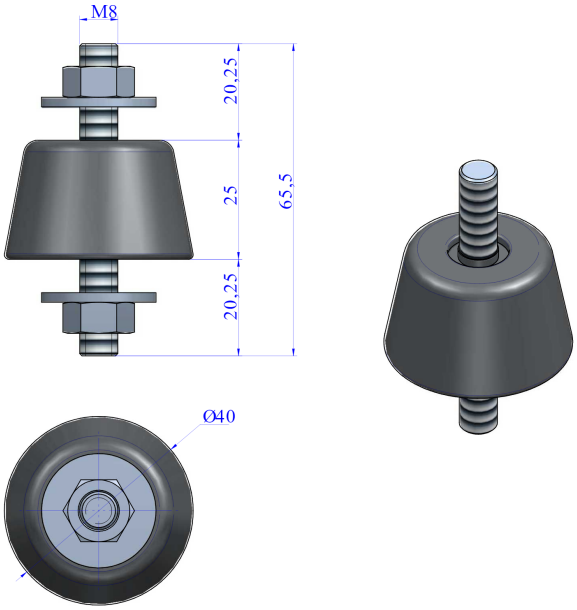

Thanks to its simple, robust, and cost-effective design, the A-35 kit is particularly suitable for **air-conditioning units, condensing units, heat pumps, fans, and other HVAC equipment**.

Technical characteristics

The AMC Mecanocaucho® A-35 supports have a softer stiffness in the direction which is perpendicular to its axis (shear).
The AMC Mecanocaucho® A-35 supports allow for relative movements between two secured elements, movement can be accommodated to provide elasticity in the case of heat expansion, chassis deformations, etc.

Advantages

Easy installation

This mount requires no major modifications to the structure for installation.
