S-60 Trapezoidal Mount Kit

Kit of 4 S-60 trapezoidal anti-vibration mounts with studs and nuts, designed for vibration isolation of equipment subject to higher loads.

The **AMC-MECANOCAUCHO® S-60 Trapezoidal Mount Kit** is a set of 4 anti-vibration mounts designed to provide **simple, reliable and cost-effective vibration isolation** for machinery and equipment subject to higher loads.

The kit includes **4 S-60 trapezoidal anti-vibration mounts with their fixing studs and nuts**, allowing simple and quick installation of the equipment on its supporting structure.

The elastomer elements provide an **elastic connection between the machine and the structure**, helping to reduce the transmission of vibration and **structure-borne noise** generated during operation.

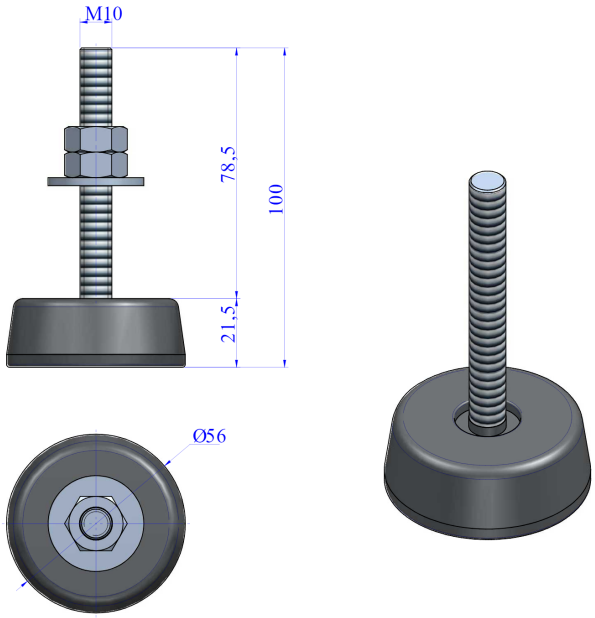

Thanks to their robust design and higher load capacity, S-60 mounts are particularly suitable for **motors, fans, pumps, auxiliary units and industrial machinery** requiring simple and reliable vibration isolation.

Technical characteristics

The AMC Mecanocaucho® S-60 supports have a softer stiffness in the direction which is perpendicular to its axis (shear). The AMC Mecanocaucho® S-60 supports allow for relative movements between two secured elements, movement can be accommodated to provide elasticity in the case of heat expansion, chassis deformations, etc.

Advantages

Easy Installation

This mount requires minimal structural modifications, making installation quick and straightforward.

Mount offering high stability

Suspensions built with this mount barely move, thanks to a geometry designed to control the movement of the suspended element.
