NFR Adjustable Machine Mounts

Height-adjustable anti-vibration machine mounts with free stud and oil-resistant NBR rubber pad, designed for installation without floor anchoring.

The **AMC-MECANOCAUCHO® NFR Adjustable Machine Mounts** are designed to support and isolate **light and heavy industrial machinery where floor anchoring is not required**.

Their **free-stud design** facilitates installation and **height adjustment**, allowing the machine to be easily levelled while providing **elastic decoupling between the equipment and the floor**. This helps to reduce the transmission of **vibration and structure-borne noise**.

NFR mounts also incorporate a **tilting system** that allows them to accommodate **uneven or slightly inclined floors**, ensuring proper support of the machine.

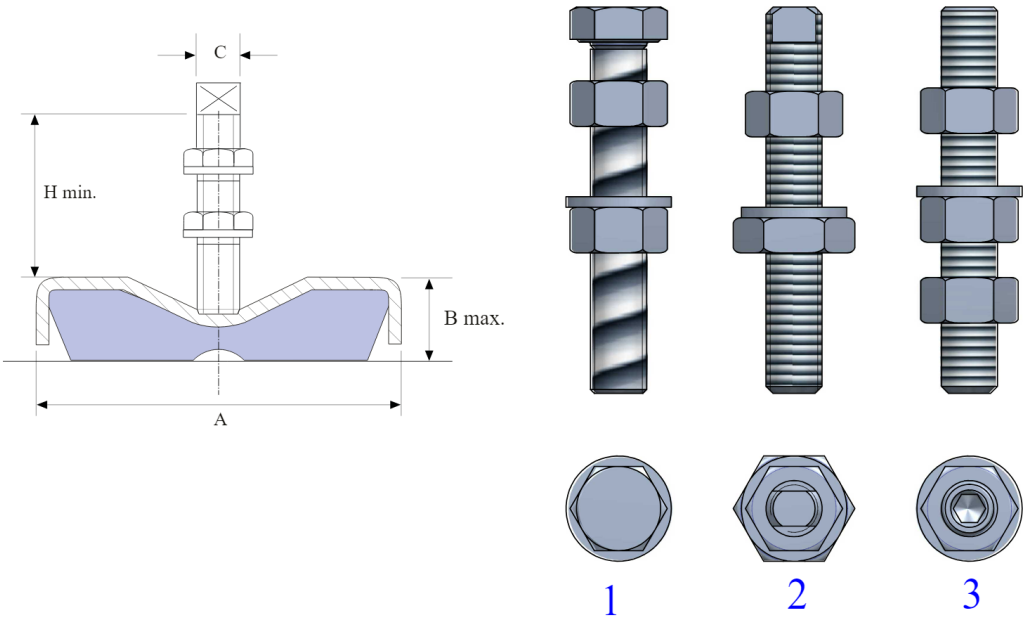

The elastic element is manufactured from **nitrile butadiene rubber (NBR)**, providing **good resistance to oils** and making the mounts suitable for a wide range of industrial environments.

NFR-200	3	200	55	M-24	140	3700	1	142013	4924

Advantages

Easy Installation

This mount requires minimal structural modifications, making installation quick and straightforward.

High protection against weathering and chemical contamination

The bell housing protects the rubber from ozone and UV radiation, while also preventing contact with diesel, oils or other chemicals that could damage it.
