

NGI Type H Machine Feet

Hygienic stainless steel levelling foot with FDA-compliant rubber and $\pm 10^\circ$ articulation, ideal for food processing and pharmaceutical machinery.

The **AMC-MECANOCAUCHO® NGI Type H Machine Feet** are specially designed for **machinery and equipment subject to high hygiene and cleaning requirements**.

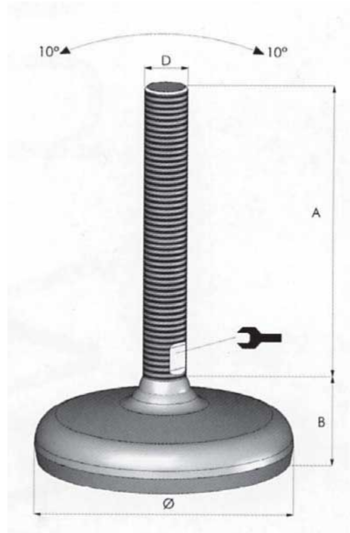

Manufactured from **stainless steel**, they feature a hygienic design with **smooth, rounded surfaces**, facilitating cleaning and minimising areas where residues may accumulate.

The base incorporates **FDA-compliant rubber**, providing stable contact with the floor. The **$\pm 10^\circ$ articulation** allows the foot to accommodate minor floor slopes and irregularities whilst maintaining correct support of the machine.

Thanks to their robust, hygienic and corrosion-resistant design, NGI Type H machine feet are particularly suitable for **food processing machinery, pharmaceutical equipment and other installations requiring frequent cleaning and high standards of hygiene**.
