PD BEIGE

Acoustic absorption panel with a smooth beige film finish. Good mid- and high-frequency absorption with a technical finish for clean and visible applications.

The **AKUSTIKABSORBER PD BEIGE** range consists of acoustic absorption panels made from **open-cell polyurethane foam**, designed to provide **good sound absorption at mid and high frequencies**, reducing reverberation and improving acoustic comfort in enclosed spaces. The panel features a **smooth beige PVC film facing**, which protects the foam against **dust, splashes, and light mechanical contact**.

The **acoustically permeable film** allows sound waves to reach the absorbent foam while providing a uniform, clean, and technical surface. Its light beige finish makes it particularly suitable for **visible installations, electrical cabinets, machinery enclosures, control cabinets, and technical rooms**, where a neat and professional appearance is required.

Thanks to its **low weight, ease of installation, and availability in different thicknesses**, PD BEIGE provides a versatile option for a wide range of **acoustic treatment applications** where no specific fire performance is required.

Technical characteristics

- CompositionPerforated beige coloured PVC facing and absorbing polyurethane foam.
- Thicknesses15mm 25mm 40mm

Formats

- Sheets1200x1000 mm
15mm thick, 8 Sheets per box.
25mm thick, 5 Sheets per box.
40mm thick, 3 Sheets per box.
- Rolls15mm thick,1500mm wide x approx. 25m long
25mm thick,1500mm wide x approx. 25m long
40mm thick,1500mm wide x approx. 20m long

Advantages

High absorption capacity

This material is highly porous and, thanks to its high absorption capacity, reduces reflections and reverberation time in enclosed spaces.
