PD CREAM

Acoustic absorption panel made from PU foam with a smooth cream PVC film. Good sound absorption and a clean finish for technical environments without specific fire requirements.

The **AKUSTIKABSORBER PD CREAM** is an acoustic absorption panel designed to **reduce reverberation and reflected sound** inside machinery, electrical cabinets, technical enclosures and industrial spaces. It consists of **open-cell polyurethane foam** with a **smooth cream PVC film facing**, providing a bright, clean and professional appearance.

The **acoustically permeable cream PVC film** allows sound waves to reach the absorbent foam whilst protecting the panel against **dust, light moisture and minor mechanical contact**. Its surface also facilitates cleaning. The light colour makes it particularly suitable for environments where a **bright and neat finish** is required without compromising acoustic performance.

PD CREAM is intended for **environments without specific fire performance requirements** and can be installed using technical adhesive or mechanical fixings. It is particularly suitable for **machinery enclosures, technical cabinets, machine interiors and visible enclosures** where a clean and discreet acoustic finish is required.

Technical characteristics

- CompositionPerforated white coloured PVC facing and absorbing polyurethane foam.
- Thicknesses15mm 25mm 40mm

Formats

- Sheets1200x1000 mm
15mm thick, 8 Sheets per box.
25mm thick, 5 Sheets per box.
40mm thick, 3 Sheets per box.

15mm thick,1500mm wide x approx. 25m long
25mm thick,1500mm wide x approx. 25m long
40mm thick,1500mm wide x approx. 20m long

Advantages

High absorption capacity

This material is highly porous and, thanks to its high absorption capacity, reduces reflections and reverberation time in enclosed spaces.
