SCB Washer

Metal washer for SCB Vibration Isolators, designed to distribute the load evenly and provide stable support for the elastomeric element.

The **AMC-MECANOCAUCHO® SCB Washers** are specifically designed for use with **SCB Vibration Isolators**, ensuring an **even distribution of loads** across the rubber element.

Their geometry provides a **suitable bearing surface for the isolator**, promoting correct deformation of the elastomer during tightening and contributing to the **stability and reliability of the assembly**.

Available in **zinc-plated steel or with a ZnNi coating**, the washers provide good **corrosion resistance** and are suitable for industrial and mobile applications exposed to demanding environmental conditions.

Combined with SCB Vibration Isolators, they provide a **compact, robust and durable isolation assembly**, while maintaining the vibration isolation performance of the system.

Technical characteristics

Washers should be used, if the rubber surface is not covered with the contact surface

Advantages

Easy Installation

This mount requires minimal structural modifications, making installation quick and straightforward.

Mount offering high stability

Suspensions built with this mount barely move, thanks to a geometry designed to control the movement of the suspended element.
