SCB Washer

Zinc-plated or ZnNi steel washers, resistant and durable, that distribute the load and improve the stability of SCB supports.

AMC Mechanocaucho SCB vibration isolators are elements that work on the basis of compression loading . Due to their design and assembly they provide an anti-rebound effect, thus providing Fail Safe conditons on assembly.

Technical characteristics

Washers should be used, if the rubber surface is not covered with the contact surface

Advantages

Easy installation

This mount requires no major modifications to the structure for installation.

Mount offering high stability

Suspensions built with this mount barely move, thanks to a geometry designed to control the movement of the suspended element.
