VT W

Spring ceiling hanger

The AMC-MECANOCAUCHO® VT W ceiling mount range is designed for the suspension of acoustic ceilings requiring a very high level of insulation. It has been developed to support profiles up to 40 mm wide on both sides of the spring hanger, thus minimizing the height of the ceiling suspension system.

These ceiling mounts are manufactured with a high mechanical performance spring and incorporate a rubber bushing designed to prevent acoustic bridges and contact from misaligned screws.

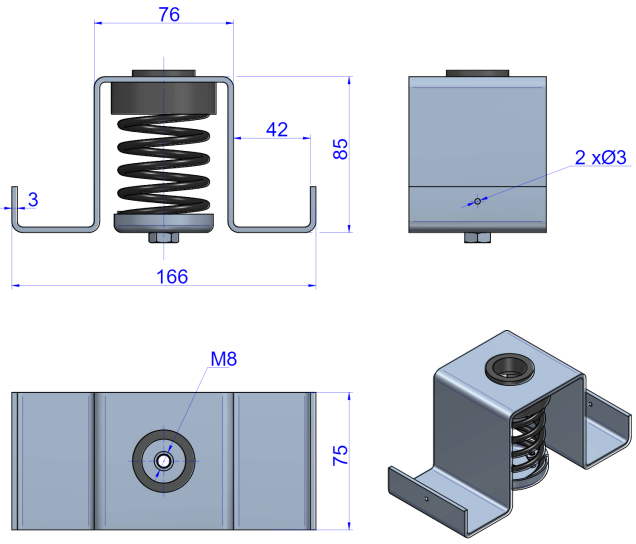

The metal structure is very robust and is supplied with an anti-corrosion galvanized coating.

Technical characteristics

NEVER METAL TO METAL CONTACT

The hanger has a clearance that allows the threaded rod to swing within a 35° angle envelope to absorb irregularities in the ceiling.
