

Akustik Slip Clip +Sylomer®

Adjustable acoustic clip with Sylomer® for metal profiles of different widths. Low-profile design and quick installation for wall linings and ceilings.

The **Akustik Slip Clip + Sylomer®** is an acoustic clip designed for the **decoupling of metal frames in wall linings and ceilings**, while providing a high degree of installation flexibility.

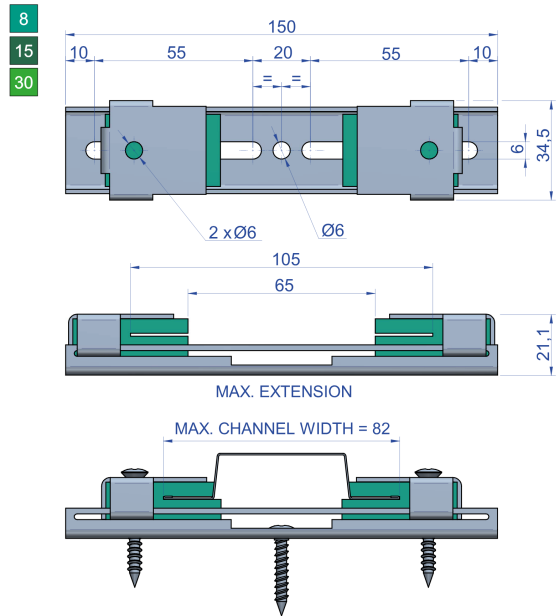

Its adjustable design allows it to **accommodate metal profiles of different widths**, facilitating its use with different framing configurations and simplifying installation on site.

The **Sylomer® resilient element** provides decoupling between the frame and the supporting structure, effectively reducing the transmission of vibrations and **structure-borne sound**, as well as minimising acoustic bridges at the fixing points.

Thanks to its **low-profile design**, the Akustik Slip Clip + Sylomer® is particularly suitable for **acoustic wall linings and ceilings where available space is limited**, in both new-build and refurbishment applications.

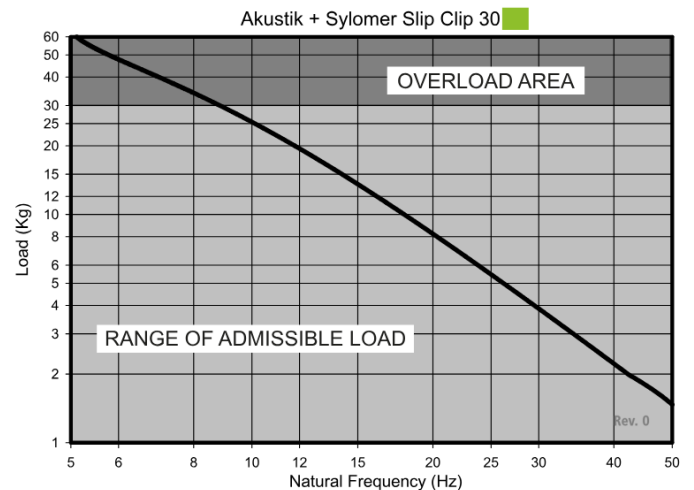

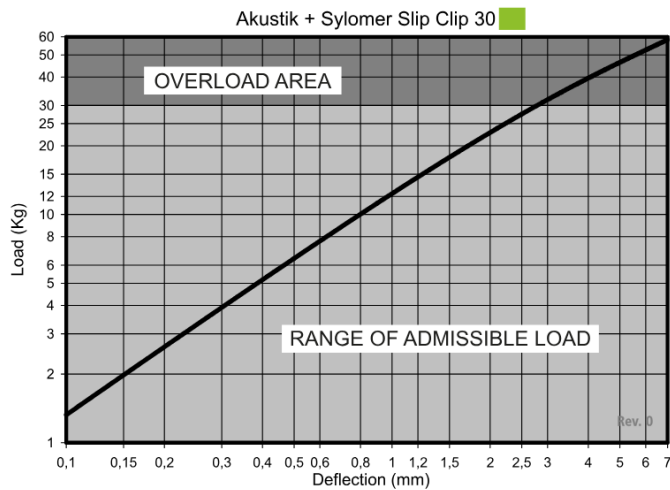

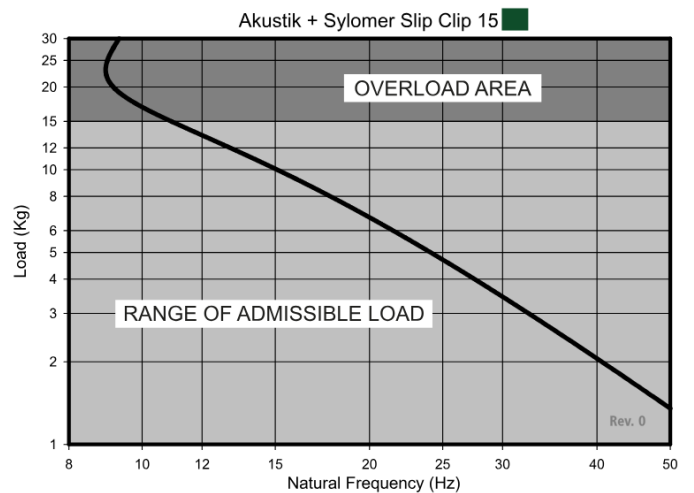

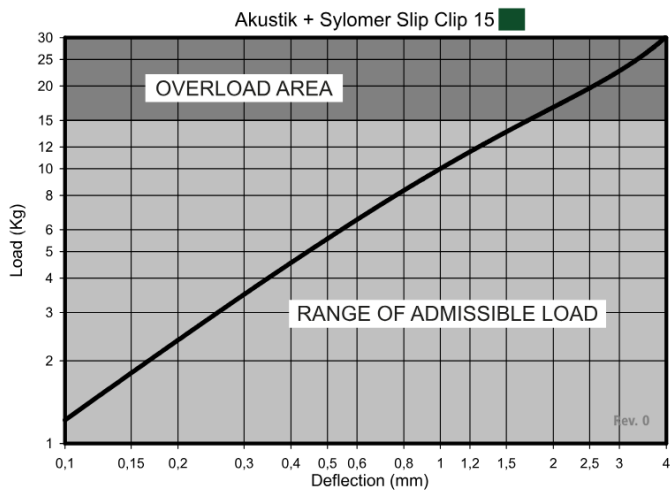

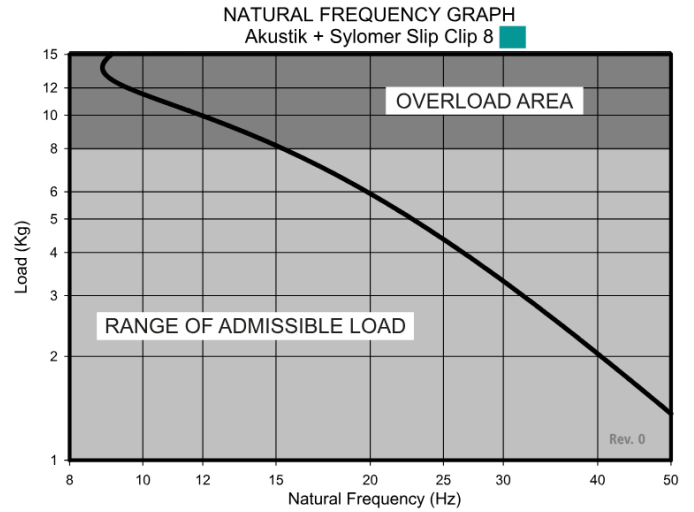

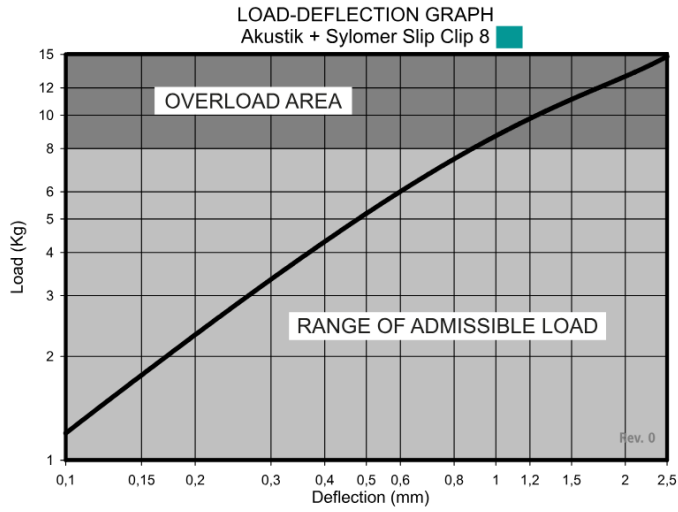

Drawings

Akustik Slip Clip + Sylomer 8 / Akustik Slip Clip + Sylomer 15 / Akustik Slip Clip + Sylomer 30

Type	Max.Load (kg)	Code	Weight(kg)
Akustik Slip Clip + Sylomer 8	8	23835	0.12
Akustik Slip Clip + Sylomer 15	15	23628	0.12
Akustik Slip Clip + Sylomer 30	30	23688	0.12

Elastic properties

*Tests performed with a furring channel installed. Part of the measured deflection comes from the flexibility of the furring channel.
